

NATIONAL **Aquaculture** ASSOCIATION

Is Aquaculture Sustainable?

AQUACULTURE (fish farming)

Production of aquatic animals and plants under controlled conditions for all or part of the life cycle.

What is Produced?

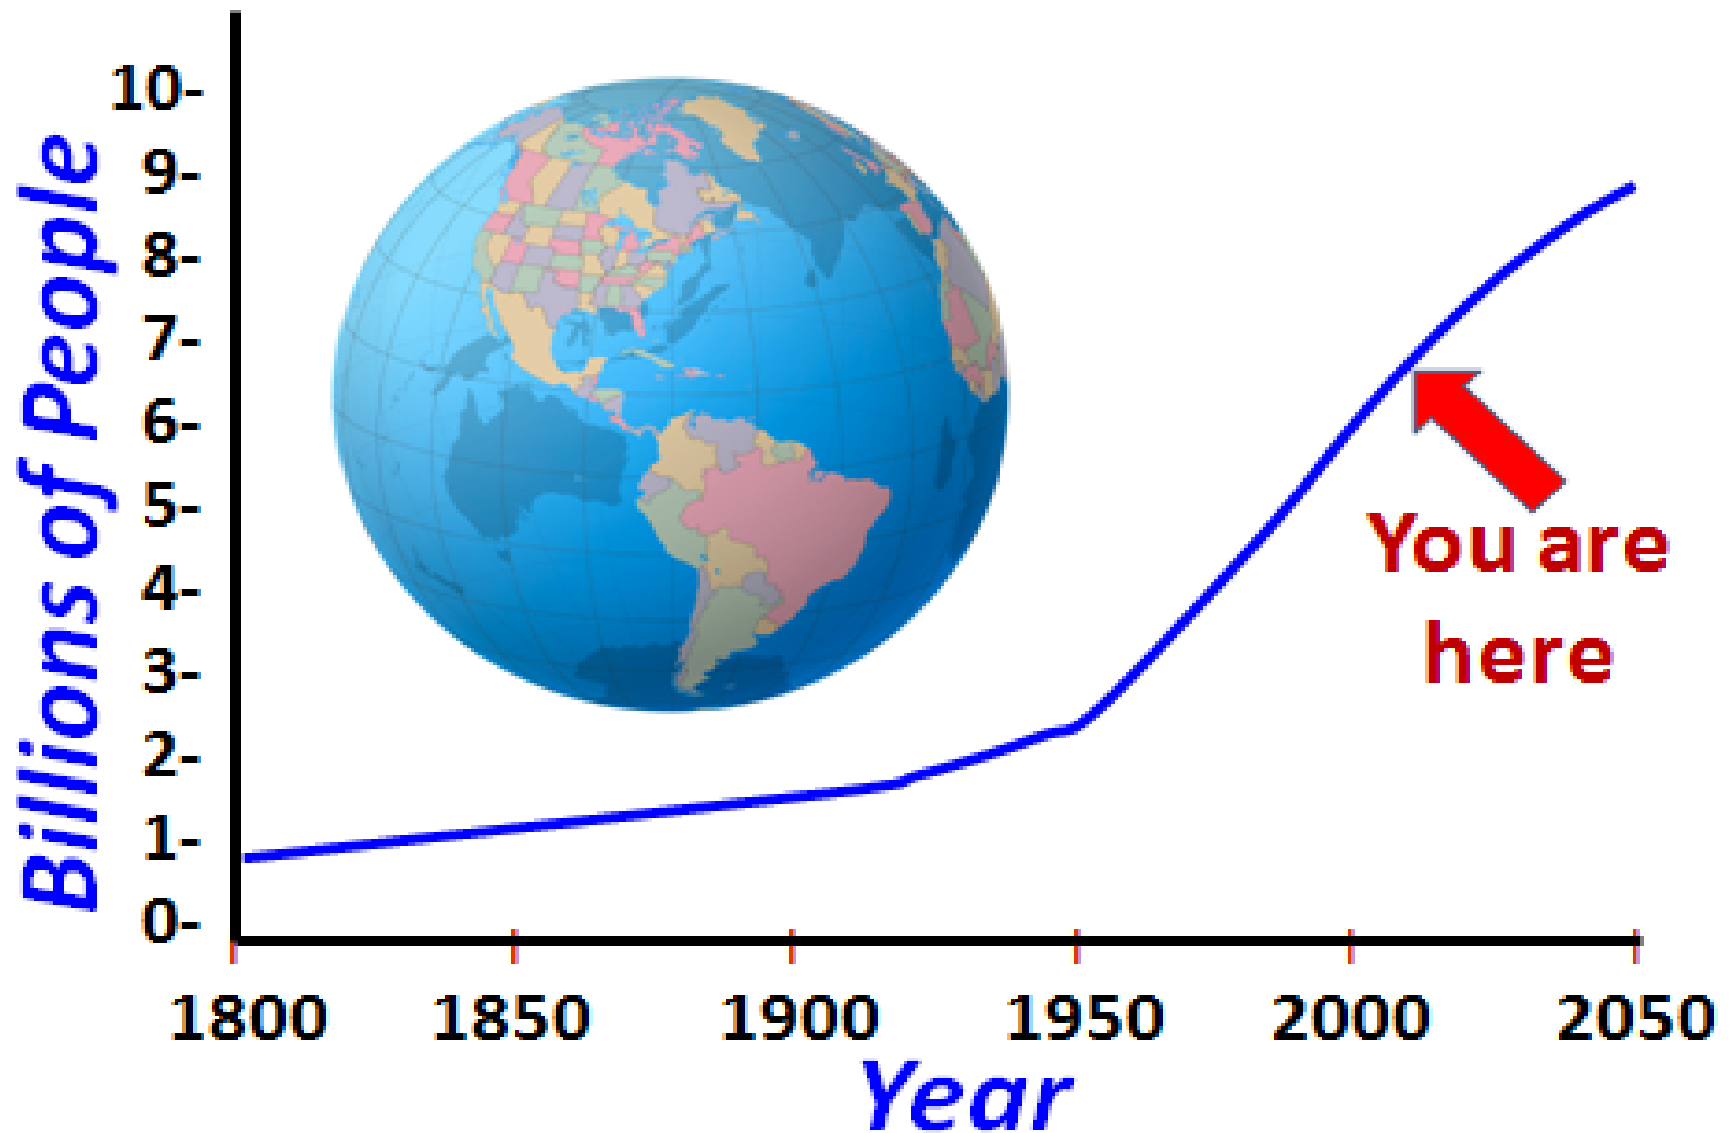

- Food -both finfish & shellfish
- Plants-food, ornamentals, remediation
- Baitfish & sportfish
- Wildlife restoration
- Companion animals
- Biological controls
- Medical research
- Amphibians & reptiles

Seafood Watch®

National Seafood Guide

Use This Guide to Make
Choices for Healthy Oceans

Best Choices
These are your best seafood choices! These fish are abundant, well managed and caught or farmed in environmentally friendly ways.

Proceed with Caution

These are better choices than seafood on the Avoid list. However, there may be some problems with the way they are caught or farmed, or important scientific information is lacking.

Avoid

Avoid these products for now.
These fish come from sources that
are overfished or caught or farmed
in ways that harm the environment.

This is a Nation

BEST CHOICES

- Crab (farmed)
- Catfish (farmed)
- Caviar (farmed)
- Clams (farmed)
- Crab Dungeness
- Crab Snow (Canada)
- Crab Stone
- Halibut Pacific
- Lochran Salmon (S. Australia)

BEST CHOICES

- Abalone (farmed)
- Barramundi (U.S.)
- Catfish (U.S.)
- Caviar/sturgeon (farmed)
- Char, Arctic (farmed)
- Clams (farmed)
- Clams, softshell
- Cod, Pacific (bottom longline)
- Crab, Dungeness
- Crab, stone
- Crawfish (U.S.)
- Halibut, Pacific
- Lobster, spiny (Australia, Baja, U.S.)
- Mackerel, Atlantic
- Mahimahi (U.S. pole/troll)
- Mullet (U.S.)
- Mussels (farmed)
- Oysters (farmed)
- Pollock, Alaska
- Sablefish/black cod (Alaska, Canada)
- Salmon (Alaska wild)
- Salmon, canned pink/sockeye
- Sardines (U.S.)

- Scallops, bay [farmed]
- Shrimp, pink [Oregon]
- Shrimp [U.S. farmed]
- Spot prawn (Canada)
- Squid, longfin [U.S.]
- Striped bass (farmed)
- Tilapia [U.S.]
- Trout, rainbow [farmed]
- Tuna, albacore (Canada, U.S.)
- Tuna, skipjack (pole/troll)
- Tuna, yellowfin [U.S. pole/troll]
- Wreckfish

● Indicates fish high in heart-healthy omega-3s and low in contaminants.

Choices for Healthy Oceans

You Have the Power

Choose seafood from the green or yellow lists to support those fisheries and fish farms that are healthier for ocean wildlife and the environment.

How to Use This Guide

It's OK to ask questions when shopping or eating out. Ask staff where their seafood is from, if it's farmed or wild-caught? How is it caught? If they're not sure, choose something else.

This is a National Pocket Guide. Please be sure to visit www.montereybayaquarium.org to view regional guides that identify sustainable alternatives in your area, or in places you plan to visit, and to learn more about your seafood choices.

BEST CHOICES

Arctic Char (farmed)
Barramundi (US farmed)
Catfish (US farmed)
Clams (farmed)
Cobia (US farmed)
Cod: Pacific (Alaska longline)⁺
Crab: Dungeness, Stone
Halibut: Pacific⁺
Lobster: Spiny (US)
Mussels (farmed)
Oysters (farmed)
Sablefish/Black Cod
(Alaska⁺ or British Columbia)
Salmon (Alaska wild)⁺
Scallops: Bay (farmed)
Shrimp, Pink (Oregon)⁺
Striped Bass (farmed or wild*)
Tilapia (US farmed)
Trout: Rainbow (farmed)
Tuna: Albacore (troll/pole, US⁺
or British Columbia)
Tuna: Skipjack (troll/pole)

GOOD ALTERNATIVES

Caviar, Sturgeon (US farmed)
Clams (wild)
Cod: Pacific (US trawled)
Crab: Blue*, King (US), Snow
Flounders, Soles (Pacific)
Herring: Atlantic
Lobster: American/Maine
Mahi Mahi/Dolphinfish (US)
Oysters (wild)
Pollock (Alaska wild)⁺
Salmon (Washington wild)*
Sablefish/Black Cod
(California, Oregon or Washington)
Scallops: Sea (wild)
Shrimp (US, Canada)
Squid
Swai, Basa (farmed)
Swordfish (US)*
Tilapia (Central America, farmed)
Tuna: Bigeye, Yellowfin (troll/pole)
Tuna: Canned Skipjack and Albacore*

AVOID

Caviar, Sturgeon* (imported wild)
Chilean Seabass/Toothfish*
Cobia (imported farmed)
Cod: Atlantic, imported Pacific
Flounders, Halibut, Soles (Atlantic)
Groupers*
Lobster: Spiny (Caribbean)
Mahi Mahi/Dolphinfish (imported)
Marlin: Blue*, Striped*
Monkfish
Orange Roughy*
Salmon (farmed, including Atlantic)*
Sharks*, Skates
Shrimp (imported)
Snapper: Red
Swordfish (imported)*
Tilapia (Asia farmed)
Tuna: Albacore, Bigeye, Yellowfin
(longline)*
Tuna: Bluefin*, Tongol, Canned
(except Albacore and Skipjack)
Yellowtail (imported farmed)

“We must plant the sea and herd its animals using the sea as farmers instead of hunters. That is what civilization is all about - farming replacing hunting.”

NATIONAL **Aquaculture** ASSOCIATION

What About Nutrition and Product safety?

2015-2020 USDA Dietary Guidelines

About half of all Americans have one or more preventable, diet-related chronic diseases, including cardio-vascular disease, diabetes, overweight and obesity

Americans consume only 44% of the seafood that they should be consuming.

The review of the evidence demonstrated, in the species evaluated, that farm-raised seafood has as much or more EPA and DHA per serving as wild caught.

Seafood Consumption & Pregnancy

Benefits of Fish Consumption During Pregnancy and Breastfeeding

- **Neurodevelopmental**
 - Visual
 - Cognitive
 - Motor
- **Improved nutritional content of breast milk**
- **Increased gestational length**
- **Management of perinatal depression**
- **Lower body fat in infancy and childhood**
- **Improved immune response**

● **Documented Benefits**

● **Emerging Benefits**

FDA Advice on Mercury & Seafood

Pregnant women, nursing mothers, women who may become pregnant, and small children should avoid certain fish—

King mackerel,
Tilefish,
Swordfish,
Shark

limit their consumption of **albacore tuna** to 6 ounces per week

Farmed Fish & Health

- Low mercury fish and shellfish include:

- ✦ Shrimp
- ✦ Channel Catfish
- ✦ Tilapia
- ✦ Trout
- ✦ Salmon

Source: FDA

FDA action level

Estimated EPA+DHA (mg) intake and mercury (ppm) in one 3-ounce portion of seafood^a

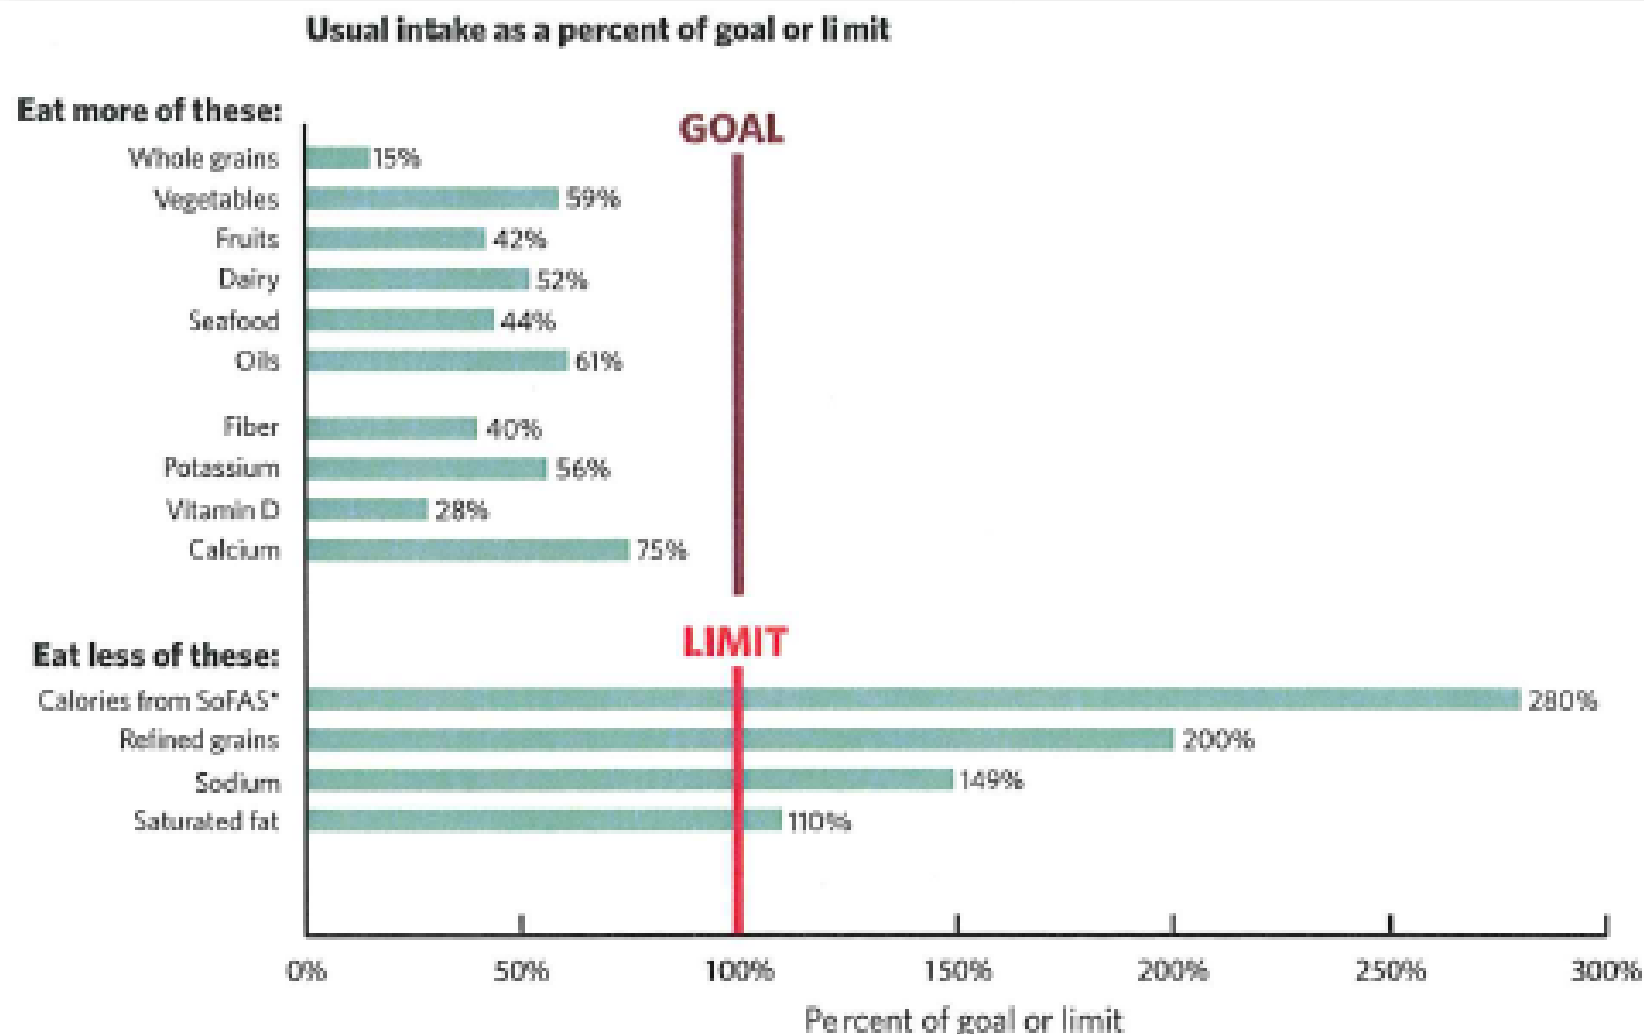

Institute of Medicine

Mercury (ppm)

EPA+DHA (milligrams)

- **National Heart, Lung and Blood Institutes**
- **US Department of Agriculture**
- **US Food & Drug Administration**

In addition to Omega-3s...

- **High quality protein**
- **Low calorie**
- **Low in saturated fats**
- **Easily digestible**
- **Low in sodium**
- **High in vitamins A, D, thiamine, niacin, B₆, B₁₂**
- **High in valuable minerals (selenium, iron, magnesium, and zinc)**

Antibiotics and Hormones

- **No growth or production hormones**
- **No growth promotion with antibiotics**
- **No pesticides**
- **Very few drugs**

Feeds

Farmed

Safety-GMOs

- Sterile
- Produce growth hormone all

The Really Exciting News...

Scientific Report of the 2015 Dietary Guidelines Advisory Committee

Advisory Report to the Secretary of Health and Human Services
and the Secretary of Agriculture

“Expanded supply of seafood nationally and internationally will depend upon the increase of farm-raised seafood worldwide”

Dietary Advice

- “Seafood varieties commonly consumed in the United States that are higher in EPA and DHA and lower in methyl mercury include salmon, anchovies, herring, shad, sardines, Pacific oysters, trout, and Atlantic and Pacific mackerel (*not* king mackerel, which is high in methyl mercury).

“Individuals who regularly consume more than the recommended amounts of seafood that are in the Healthy U.S-Style Pattern should choose a mix of seafood that emphasizes choices relatively low in methyl mercury.”

“Consistent with overall sustainability goals, farm-raised finfish (e.g., salmon and trout) is more sustainable than terrestrial animal production (e.g., beef and pork) in terms of GHG emissions and land/water use.”

“The review of the evidence demonstrated, in the species evaluated, that farm-raised seafood has as much or more EPA and DHA per serving as wild caught.

It should be noted that low-trophic seafood, such as catfish and crawfish, regardless of whether wild caught or farm-raised seafood, have less EPA and DHA per serving than high-trophic seafood, such as salmon and trout.”

Attributes of U.S. Farm-Raised Seafood

- Environmentally-sound production methods
- Product safety
- Consistency in price
- Consistency in supply
- Local production
- Product quality
